## Sudden Cardiac Arrest (SCA) knows no boundaries

In Australia approximately 30,000 people sustain cardiac arrest outside hospital and are treated by emergency medical services (EMS) each year<sup>1</sup>

An average of only 9% of its victims in Australia survive:

It can happen anytime, anywhere and to anyone, even young athletes. Early defibrillation is the single most effective treatment for SCA. Defibrillation within three minutes of collapse can increase the chance of survival to over 70%<sup>2</sup>
