With the Government's IR Productivity Commission Inquiry still on the agenda and the ACTU announcing their casual conversion claim in response to insecure work, we look to explore the interaction between the social impacts of workplaces and their economic imperatives.

Our debaters will examine such questions as:

What is the relationship between social and economic outcomes in assessing our workplace laws and policies?

How do we consider concepts such as dignity of work and decent work in our contemporary society?

What role does our workplaces relations system play in addressing rising inequality?

Join us for a challenging and engaging discussion that will consider the world of work today.

Presented by The Australian Institute of Employment Rights, an independent, not-for-profit organisation that works in the public interest to promote fairer workplaces. www.aierights.com.au
